

# HOME LEARNING MAKER MAT

Can you explore any rocks from around your local area or garden? What rock do you think it might be? Label a diagram.

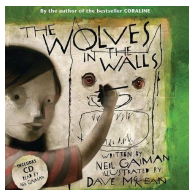

Design and make a poster of your own computer programme.

Look up a different country from the one you live in. How do you think the life of a child who lives there is similar/different to you? Create a fact poster!

Create a fort using spare blankets/pillows/bedding and pretend you can hear wolves around you. Can you describe how you would feel?

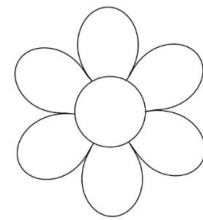

Year 3

Spring 1

Make a friendship flower. Write a quality of friendship on each petal. Draw a picture to show what that quality looks like.

Create a sedimentary dessert or cake modelling how rocks are formed.

Can you use clay/playdough to create your own fossil?

Practise your aim by throwing a ball into a container. Compete with others. Move further away from the container to challenge yourself!

**Please complete at least 3 activities and return your projects by 7th February**
